Cloud Tile 25L	1150 x 575 x 25	4	4	-
Cloud Tile 25XL	1500 x 575 x 25	8	6	-
Corner Bass Trap	575 x 575 x 100	4	-	2
Corner Bass Trap L	1150 x 575 x 100	6	-	2
Bass Trap 50L	1150 x 575 x 50	4	4	-

For best adhesion to your wall allow the Magic Tape strips to acclimatise to room conditions before use.

1. Gently place the grip side of the tape onto the exposed fabric border on the back of the tile or trap.
2. Remove the backing film (smooth side) from the tape. Place tile or trap in a pre-determined position and apply gentle pressure to ensure the tape sticks to the wall.
3. Gently pull the tile or trap directly towards you, **not up or down**, leaving the tape on the wall.
4. Apply firm pressure to the tape on the wall. Leave for a minimum of 30 minutes for adhesive to cure before attaching your treatments.

Magic Tape Strips on a Tile 25

Strips and Brackets on a Corner Bass Trap

When installing Corner Bass Traps please use the Support Brackets in addition to the Magic Tape.

**Care should be taken not to detach the fabric from the rear of the tile or trap when removing or re-positioning. Always pull the tile towards you rather than up or down.**

**Adhesion to all surfaces cannot be guaranteed. In certain cases additional adhesives / fixings may be required.**

Cloud Tile Fixings with Screw Eyes

When installing Spectrum Studio Ceiling Clouds screw the hooks into the tile as shown in the diagram. If your product has additional paper backing please screw through this. The included Screw Eyes can be used to hang the tiles from a number of ceiling types using the appropriate wall plugs (not supplied).
